

# PF4MNP FAN COIL SIZES 018 THRU 060

## Product Data

A160199

### AIR HANDLER TECHNOLOGY AT ITS FINEST

The PF4MNP fan coil has proven technology with R-410A refrigerant as well as vertical and horizontal applications. The design features contoured condensate pans with rugged drain connections, ensuring that little water is left in the unit at the end of the cooling duty cycle. The lack of standing condensate and corrosion free pans improves IAQ and product life, features homeowners appreciate.

Standard features include grooved tubing and louvered fins. Coil circuiting has also been updated to make the most of all heat pumps and air conditioners. Units come with solid state fan controls, 1-inch (25mm) thick insulation with R-value of 4.2, multi-speed motors, and fully-wettable coils. Units can accommodate factory- and/or field-installed heaters from 3 to 30 kW.

The PF4MNP fan coil design is loaded with popular features. These fan coils utilize the latest in electronic commutation motor (ECM) technology through the use of high efficiency, multi-tap ECM motors allowing reliable air delivery with increased static pressure. It comes in a pre-painted (taupe metallic) galvanized steel casing and a factory-supplied power plug for ease of installation. The PF4MNP unit is shipped with an R-410A refrigerant TXV.

In order to meet the California Title 24 requirement of 1.4% air leakage at 0.5" water, an accessory kit is available. (Refer to Accessories section.)

### STANDARD FEATURES

- Multi-tap ECM (electronic commutating motor) motors - all sizes
- Integrated motor controls, with 90-sec off TDR function, have replaced integrated circuit board
- Five available speed taps to meet a wide range of applications
- Large, grooved tube, louvered fin coils
- Efficient, quiet, time-tested blower housings and diffusers
- Sturdy, drainable condensate pans
- Cabinet construction features innovations designed to prevent cabinet sweating
- Tested for condensate disposal in much tougher conditions than Air Conditioning and Refrigeration Institute requirements
- Super-thick R-4.2 insulation with vapor barrier
- Pre-painted galvanized steel cabinet (taupe metallic)
- Installation-flexible, multipoise units
- Horizontal hanging provisions on cabinet
- No tools required to access filter
- Newly improved filter rack area filter door insulation added for improved air seal
- Factory-installed heater packages available on select models (5- through 15-kW)
- 3- through 30-kW accessory heaters - field installed
- Factory-supplied power plug
- Easy plug-in provisions for heater installation
- Entry options for high and low voltage wiring hook-up
- Leak-preventing sweat connections
- Thermostatic expansion valve, TXV, on all coils
- Designed for manufactured housing applications

Use of the AHRI Certified TM Mark indicates a manufacturer's participation in the program. For verification of certification for individual products, go to [www.ahridirectory.org](http://www.ahridirectory.org).

■ – Airflow above 450 cfm/ton.

**NOTES:**

- Airflow based upon dry coil at 230v with factory-approved filter and electric heater (2 element heater sizes 018 through 036, 3 element heater sizes 042 through 060). For PF4MNP models, airflow at 208 volts is approximately the same as 230 volts because the multi-tap ECM motor is a constant torque motor. The torque doesn't drop off at the speeds the motor operates.
- To avoid potential for condensate blowing out of drain pan prior to making drain trap:  
Return static pressure must be less than 0.40 in. wc.  
Horizontal applications of 042 – 060 sizes must have supply static greater than 0.20 in. wc.
- Airflow above 400 cfm/ton on 048–060 size could result in condensate blowing off coil or splashing out of drain pan.

CFM – Cubic Ft per Minute      EWB – Entering Wet Bulb °F (°C)      LWB – Leaving Wet Bulb °F (°C)      TC – Gross Cooling Capacity 1000 Btuh  
 SHC – Gross Sensible Capacity 1000 Btuh      BF – Bypass Factor      MBH – 1000 Btuh

**NOTES:**

- Contact manufacturer for cooling capacities at conditions other than shown in table.
- Formulas:  
 Leaving db = entering db -  $\frac{\text{sensible heat cap.}}{1.09 \times \text{CFM}}$   
 Leaving wb = wb corresponding to enthalpy of air leaving coil ( $h_{lwb}$ )  
 $h_{lwb} = h_{ewb} - \frac{\text{total capacity (Btuh)}}{4.5 \times \text{CFM}}$   
 where  $h_{ewb}$  = enthalpy of air entering coil. Direct interpolation is permissible. Do not extrapolate.
- SHC is based on 80°F (27°C) db temperature of air entering coil. Below 80°F (27°C) db, subtract (Correction Factor x CFM) from SHC. Above 80°F (27°C) db, add (Correction Factor x CFM) to SHC.
- Bypass Factor = 0 indicates no psychometric solution. Use bypass factor of next lower EWB for approximation.

**SHC CORRECTION FACTOR**

<b>BYPASS FACTOR</b>	<b>ENTERING AIR DRY-BULB TEMPERATURE (°F)</b>					
	79	78	77	76	75	Under 75

## PERFORMANCE DATA (cont.)

### ELECTRIC HEATER STATIC PRESSURE DROP (in wc)

PF4MNP 018 – 036			PF4MNP 042 – 060		
HEATER ELEMENTS	kW	EXTERNAL STATIC PRESSURE CORRECTION	HEATER ELEMENTS	kW	EXTERNAL STATIC PRESSURE CORRECTION
0	0	+ .02	0	0	+ .04
1	3, 5	+ .01	2	8, 10	+ .02
2	8, 10	0	3	9, 15	0
3	9, 15	- .02	4	20	- .02
4	20	- .04	6	18, 24, 30	- .10

The airflow performance data was developed using fan coils with 10–kW electric heaters (2 elements) in the 018 through 036 size units and 15–kW heaters (3 elements) in the 042 through 060 size units. For fan coils with heaters of a different number of elements, the external available static at a given CFM from the curve may be corrected by adding or subtracting available external static pressure as indicated above.

PF4MNP060L00	3/4	6.0	208/230/1/60	7.5	15	14

\*Use copper wire only. Use 75°C only in this application. When using non-metallic (NM) sheathed cable, wire size required should be based on that of 60°C conductors, instead of wire sizes shown in table above per NEC Article 336-26.

**NOTE:** If branch circuit wire length exceeds 100 ft (30 m), consult NEC 215-2 to determine maximum wire length. Use 2% voltage drop.

**FLA** – Full Load Amps

\*Includes blower motor amps of largest fan coil used with heater.  
†Copper wire must be used. If other than uncoated (non-plated), 75°C ambient, copper wire (solid wire for 10 AWG and smaller, stranded wire for larger than 10 AWG) is used, consult applicable tables of the National Electric Code (ANSI/NFPA 70).  
‡Length shown is as measured 1 way along wire path between unit and service panel for a voltage drop not to exceed 2%.  
\*\*Field convertible to 3 phase.  
††Field convertible to 1 phase, single or multiple supply circuit.

**NOTES:**

- For fan coil sizes 018–036.
- For fan coil sizes 042–060.
- Single circuit application of F15 and F20 heaters requires single-point wiring kit accessory.

## HEATER ELECTRICAL DATA

### ELECTRIC HEATER INTERNAL PROTECTION

HEATER kW	PHASE	FUSE QTY/SIZE	CKT BKR* QTY/SIZE
5	1	—	1/60
8	1	—	1/60
9	1/3	—	—
10	1	—	1/60
15	1	2/30-2/60	2/60
15	3	—	—
18	3	—	—
20	1	4/60	2/60
24	1/3	6/60	—
30	1/3	6/60	—

\*All circuit breakers are 2 pole.

When using units with 20-, 24-, and 30-kW electric heaters, maintain a 1-in. (25mm) clearance from combustible materials to discharge plenum and ductwork and maintain a distance of 36-in (914mm) from the unit. Use an accessory downflow base to maintain proper clearance on downflow installations. Use flexible connectors between ductwork and unit to prevent transmission of vibration. When electric heater is installed, use heat resistant material for flexible connector between ductwork and unit at discharge connection. Ductwork passing through unconditioned space must be insulated and covered with vapor barrier.

### ACCESSORIES

ITEM	ACCESSORY PART NO.*	FAN COIL SIZE USED WITH
1. Disconnect Kit	KFADK0201DSC	All single phase 3kW – 10kW heaters
2. Downflow Base Kit	KFACB0101CFB	018
	KFACB0201CFB	025, 030, 036
	KFACB0301CFB	042, 048, 060
3. Downflow Conversion Kit †	KFADC0201SLP	Slope Coil Units—018, 025, 030, 036
	KFADC0401ACL	A-Coil Units—042, 048, 060
4. Downflow/Horizontal Conversion Gasket Kit	KFAHD0101SLP	All
5. Horizontal Water Management Kit (25 pack) ‡	KFAHC0125AAA	A-Coil Units—042, 048, 060
6. Single-Point Wiring Kit	KFASP0101SPK	Only with 15- and 20-kW Fused Heaters
7. Filter Kit (12 Pack)	KFAFK0112SML	018
	KFAFK0212MED	025, 030, 036
	KFAFK0312LRG	042, 048, 060
8. Fan Coil Filter Cabinet (Fan Coil Filter Media)	FNCCABCC0014 (FILXXFNC0014)	018
	FNCCABCC0017 (FILXXFNC0017)	025, 030, 036
	FNCCABCC0021 (FILXXFNC0021)	042, 048, 060
9. PVC Condensate Trap Kit (50 pack)	KFAET0150ETK	All
10. Air Cleaner 240-volt Conversion Kit	KEAVC0201240	All
11. Standard Filter Rack Kit	KFAFR0101FRM	018
	KFAFR0201FRM	025, 030, 036
	KFAFR0301FRM	042, 048, 060
12. TXV Kit R-22, Aluminum Coils Only	KSBTX0601HSO	018, 025, 030, 036, 042
	KSBTX0701HSO	048
	KSBTX1001HSO	060
13. Low Air Leakage Kit (Title 24, California requirement)	GSKT-KIT-01	All

\* Factory authorized and listed, field-installed.

† KFAHD0101SLP must also be purchased for downflow applications.

‡ KFAHD0101SLP must also be purchased for downflow or horizontal applications.

## ACCESSORY KITS DESCRIPTION SUGGESTED AND REQUIRED USE

### **Disconnect Kit**

The kit is used to disconnect electrical power to the fan coil so service or maintenance may be performed safely.

**SUGGESTED USE:** Units for 3- through 10-kW electric resistance heaters and cooling controls.

### **Downflow Base Kit**

This kit is designed to provide a 1-in. (25mm) minimum clearance between unit discharge plenum, ductwork, and combustible materials. It also provides a gap-free seal with the floor.

**REQUIRED USE:** This kit must be used whenever fan coils are used in downflow applications.

### **Downflow Conversion Kit**

Fan coils are shipped from the factory for upflow or horizontal-left applications. Downflow conversion kits provide proper condensate water drainage and support for the coil when used in downflow applications. Separate kits are available for slope coils and A-coils.

**REQUIRED USE:** This kit must be used whenever fan coils are used in downflow applications.

### **Downflow/Horizontal Conversion Gasket Kit**

This kit provides the proper gasketing of units when applied in either a downflow or horizontal application.

**REQUIRED USE:** Fan coils in either downflow or horizontal applications.

### **Horizontal Applications - Water Management Kit**

This kit provides proper installation of fan coils under conditions of high static pressure and high relative humidity.

**SUGGESTED USE:** All fan coils.

### **Single Point Wiring Kit**

The single point wiring kit acts as a jumper between L1 and L3 lugs, and between the L2 and L4 lugs. This allows the installer to run two heavy-gauge, high-voltage wires into the fan coil rather than 4 light-gauge, high-voltage wires.

**SUGGESTED USE:** Fan coils with 15- and 20-kW fused heaters only.

### **Filter Kit (12 pack)**

The kit consists of 12 fan coil framed filters. These filters collect large dust particles from the return air entering the fan coil and

prevents them from collecting on the coil. This process helps to keep the coil clean, which increases heat transfer and, in turn, the efficiency of the system.

**SUGGESTED USE:** To replace filters in fan coils.

**REQUIRED USE:** All units unless a filter grille is used.

### **Fan Coil Filter Cabinet**

This cabinet is mounted to the fan coil on the return air end and designed to slip over the outer fan coil casing. The cabinets are insulated using the same insulation as production fan coils. They are designed for the removal of particulates from indoor air using FILXXFNC00(14, 17, 21, 24) media filter cartridges. These fan coil media filter cartridge kits are designed for the removal of particles from indoor air. The cartridge is installed in the return air duct next to the air handler or further upstream.

**SUGGESTED USE:** All fan coils.

### **Condensate Drain Trap Kit**

This kit consists of 50 PVC condensate traps. Each trap is pre-formed and ready for field installation. This deep trap helps the system make and hold proper condensate flow even during blower initiation.

**SUGGESTED USE:** All fan coils.

### **Air Cleaner 240-volt Conversion Kit**

The AIRA electronic air cleaner comes ready for 115-v operation.

**REQUIRED USE:** This kit is required when running 240-volt circuit to air cleaner.

### **Standard Filter Rack Kit**

This kit mounts in fan coil filter rack area and modifies the existing filter rack to support standard 1-in. filter sizes.

**SUGGESTED USE:** Fan coils using standard filter sizes.

### **TXV Kit**

These kits are designed to convert R-410A fancoils to R-22 TXVs.

### **Low Air Leakage Kit**

This kit is available through MicroMetl and when installed as per the instructions provided in the kit, is designed to meet the stringent 1.4% air leakage at 0.5" water requirement as set by California Title 24 code. To order this kit, call MicroMetl Customer Service Department at 800.884.4662.
